IEEE Computer Society Periodicals - Request for to Change Author List

The form below should be completed for any authorship changes including adding new authors, removing existing authors, or reordering existing authors.

Publication Title	IEEE Transactions on Mobile Computing
Manuscript Title	Exploring MEC Server Strategy in Blockchain Networks: Mining For Mobile Users or For Self
Manuscript ID #	TMC-2024-06-0855
Current Author List/Order	Xintong Ling, Weihang Cao, Mingkai Chen, Jiaheng Wang, Yaxuan Yang, Zhi Ding, and Xiqi Gao
Requested Author List/Order	Xintong Ling, Rui Jiang, Weihang Cao, Mingkai Chen, Jiaheng Wang, Zhi Ding, and Xiqi Gao

Please use the relevant field(s) below to describe the nature and reason(s) for the change(s) being requested:

Changes to the Order of Authors	
Addition of New Author(s)	We request to add Rui Jiang as the second author in recognition of his significant contributions to the article.
Removal of Existing Author(s)	We request to remove Yaxuan Yang as an author. The specific reasons will be explained later.

1. **Please provide the following information for any author(s) being added:**

Author Name:	Rui Jiang
Author Institution:	Southeast University, National Mobile Communications Research Laboratory
Author Email Address:	ruijiang@seu.edu.cn
Specific Contribution(s):	Rui Jiang has made significant contributions to this study, in terms of game model, Nash equilibria analysis, and simulation, and has largely improved the quality of the manuscript. Rui Jiang's main contributions are listed as follows: (a) He conducted further in-depth analysis of the existing MEC blockchain mining model, examined the limitations of the MEC computation power renting model and demonstrated its economic inefficiencies from both theoretical and practical perspectives. (b) He made the manuscript diving deeper into the Nash equilibria analysis for the proposed mining game and characterized the strategies of MEC servers and mobile users. (c) He illustrated the motivations for introducing network value and derived the corresponding Nash equilibrium, and optimized the theoretical results to improve clarity and precision. (d) He enhanced the simulation for a better presentation of edge mining game by discussing new performance metrics and ensuring robust validation of the proposed model. He further emphasized the wide applicability of the findings and outlined a plan for future research. (e) He also made a great contribution to respond the reviewers' comments in the first round and has revised the manuscript extensively. In conclusion, all the coauthors agree to add Rui Jiang as the second author for his contributions.

2. **Please provide the following information for any authors being removed:**

Author Name:	Yaxuan Yang
Author Institution:	Southeast University, National Mobile Communications Research Laboratory
Author Email Address:	220210892@seu.edu.cn
Reason for Removal:	Yaxuan Yang graduated earlier this year and has since started working full-time. She no longer participates in this paper and has quit this work due to her job and personal reasons.

Please provide the signatures of all living authors, those remaining, those newly added, and/or those to be removed, confirming that they consent to these changes:

Author Name	Please indicate whether you are an existing author, an author being added, or an author being removed?	Do you consent to the proposed changes (Y/N)	Author Signature	Date
Xintong Ling	existing author			
Rui Jiang	author being added			
Weihang Cao	existing author			
Mingkai Chen	existing author			
Yaxuan Yang	author being removed			
Jiaheng Wang	existing author			
Zhi Ding	existing author			
Xiqi Gao	existing author			

Author Name	Please indicate whether you are an existing author, an author being added, or an author being removed?	Do you consent to the proposed changes (Y/N)	Author Signature	Date
